In order to continue developing amazing new products, we are currently seeking a

Frontend Software Developer

80-100%

As a member of our growing Product Development department, reporting to the CTO, you will be part of a cross-functional agile team, working closely with the Product Managers.

Even though a typical day at work doesn't exist, here is what your day may look like:

- You take part in the daily standup with your squad of 4-8 people, a member of the QA team, and the Product Manager. You discuss how the whole team can achieve the sprint goal.
- You get back to your desk in the open office with your colleagues (or possibly in your cozy home, depending on the day). You complete a user story on the login feature based on the wireframes, in Vue.js on your Linux PC. You implement the last changes proposed by your colleagues in a Cypress end-to-end test and fix a failed CI pipeline on Gitlab.
- You deploy the branch code version on a simulated setup and carry on a usability test with a remote user.
- You take part in a design studio to define the optimal user flow for the future wizard.

In an ideal world, here is how we imagine you:

- Hold a Master's degree in Computer Science or a related field.
- Bring 5-15 years of professional programming experience, with fluency in frontend frameworks (Vue, Angular, React).
- Familiar with UX best practices, Docker, and cloud technologies.
- Enthusiastic about industrial robotics and automation.
- Thrive in fast-paced, agile environments and excel as a team player with strong communication skills.
- Proficient in French and English.

Innovation, challenge, team spirit and open-mindedness are part of Asyriil's culture. Every day is unique. Joining Asyriil means joining a fast-growing company and benefiting from a multicultural and stimulating environment, with varied activities.

Our office is located in the technology park "Le Vivier" in Villaz-St-Pierre, home to several high-tech companies. This environment enables us to offer attractive working conditions in a modern infrastructure. We have an international presence, with subsidiaries in Germany, in the USA, in Japan and in Singapore.

You are interested in this challenging role? Apply now by sending your complete application (in English or French) to: hr@asyriil.com
